REPORT OF SUPERINTENDENT OF SCHOOLS

---

To the Wilmot School Board and the Citizens of Wilmot:

Much is being spoken and written today about our system of education. Its weaknesses are condemned, its leaders assailed, its philosophy and methods of operation sharply criticized. Widespread differences exist as to curricula, methods of instruction, discipline, qualifications of teachers, excessive costs of buildings and administration, ultimate objectives to be attained – in short, education is “under fire”.

Whether the attack stems from revolt against so-called Progressive Education, or over-emphasis on functional learning, or the aftermath of “sputniks”, the results are the same – namely, the people have awakened to the needs of making some changes in our educational pattern.

Because of this wave of protest, this sudden burst of criticism, this tremendous interest of the people, there will be changes. Our schools are expanding in size, our people are making greater financial efforts locally, our State Department of Education is leading the way in terms of improved standards for both teachers and curricula. All these things are bound to produce changes. And this, to my mind, is good. It is good for us as a people to recognize educational weaknesses, to admit to our faults and to advance, through patient experiment, toward higher goals of human betterment.

More and more, then, we need to utilize the most competent minds; to weigh and test and measure the results of research; to spend wisely, after knowing what we are spending for; to seek and employ people who are not only well-trained, but who have real interest in promoting education.

We also need the helping hands of our interested parents, not to tell us how to run our schools, but to work along with us in the task of improving our schools.

Our school boards have much responsibility for what our schools become. They should and do work with the superintendent and teachers in a cooperative effort. They need to be men and women of good sound common sense, courageous and honest, willing to work and take responsibility.

Our teachers are our strength and bulwarks. They must be well-trained, healthy, well-balanced mentally, conscientious, hard-working people. They must be interested in working with and for children. They should be devoted to the cause of education. They should be active in social living in the school room and in the local community as much as possible. They should respect the profession of teaching and observe its ethics.

Our task, now more than ever, lies before us as a real challenge to carry on the vital work of education in a great democracy – ever remembering that it is the little communities and their schools that help make up the great country and the great system of education of the United States of America.
